problem solving

9/28

$$N = \$42$$

$$\text{cost} = \frac{1}{2}$$

$$N = 2L$$

$$N = \$42 \times \frac{1}{2}$$

$$N = \$7$$

$$2L = 42 \times \frac{1}{2}$$

$$L = \frac{21}{2}$$

$$L = 3.50$$

$$m = c + 3$$

$$\begin{array}{r} 10 = c + 3 \\ - 3 \quad - 3 \\ \hline \end{array}$$

$$7 = c$$
